

I

ISLANDS

These are English Jesty islands shown that are not linked to the main tree, in Gosport and Chester. The last panel shows the inheritance of Benjamin's portrait to his son Robert and then granddaughter Edith (Jesty) Pope, and thence to Frank Pope in Molteno, South Africa. [Sheet CAN](#) details the much larger island of Jestys in Canada descended from George and Annie Jesty of Newfoundland, whose English roots remain unknown.

A previous island covering south Somerset and Portland, has expanded a bit, and moved to a new sheet of its own, [sheet SOM](#). It includes a possible "missing" George Jesty, who might (if we're optimistic) be connected with the founding of the Canadian line.
